SUMMARY

I am a mobile and website developer with two years, I love solving complex problems, with simple solutions and I like to spend most of my time working, developing my skills and learning.

WORK EXPERIENCE

Innces App || Mobile Application. (REST API)

2021-Present

- **Started by INCESS**, this project is a huge mobile social networking project with a team of 5 engineers.
- And I started working with them and added services like.
- My travel service, and this service is similar to the **Uber** application because it contains an applicant and a service provider, and the applicant is an employee of the company and provides his services to the applicant's request such as providing housing, transportation, food, etc., because this service is intended for expatriates outside the country
- And I solved some problems in the application such as
 - 1 - Add a post
 - 2 - Add a video
 - 3- Create a video channel for the user
 - 4- Create a messenger chat. And a lot of details
 - 5- Add electronic payment

Aljeeran ERP || Mobile ios And Web. (REST API)

2021-Present

- It is an Enterprise Resource Planning (**ERP**) system for a Kuwaiti law firm.
- This system manages everything in the company.. I participated in it in some points such as
 - 1 Possibility to search for a case
 - 2 add a case
 - 3 deletes basket
 - 4 Managing the users
 - 5 Report
 - 6 settings

Accounts And Restaurants System|| Web Application.

2021-Present

- **An accounting system** for factory management or any facility that needs an accounting system and can be converted from internal counters to become a program for managing restaurants..
- I did this project with a team of my co-workers..the program was built on the (**REST API**) system
- I added a lot of features
 - 1 Adding a barcode to the goods
 - 2 Add a golden client
 - 3 Add a section with assets
 - 4 Add the raw materials section
 - 5 add the manufacturing department
 - 6 Add the goods inventory section
 - 7 Add the restaurant's section
 - 8 Adding a section for exchanging goods with exchange partners

- 9 Add sales invoices
- 10 add purchase invoices
- 11 Adding a safe and a bank section
- 12 Parts of receipt and exchange vouchers
- 13 Term Debt Clients Section
- 14 Expense Section
- 15 The possibility of linking branches

ERP System || Web Application . (REST API)

2021-Present

- The **ERP** program that **INNCEs** is based on, participated in it at some points such as
 - 1: Daily entries, in which all calculations are recorded on the same day
 - 2: The safe, in which the money, the inputs, and outputs of the company, are calculated
 - 3: The covenant, in which the accountants are given the covenant and are settled
 - 4: The list of penalties adds laws to the company and applies penalties to employees
 - 5: The employees are adding employees and recording the time of attendance and the time of departure and absence
 - 6: The list of expenses shows all the expenses of the company in any period
 - 7: Receipt and exchange bonds to manage the money entering and leaving the company

Truck Balance System || Web Application Combined Embedded System.

Apr 2021 - Jun 2022

- It is a program that automatically reads from any truck scale and the program stores
- all weighing data such as the car number, driver name, type of car, and type of
- weighted merchandise, and converts that into an excel file with a complete control
- panel to control the system

Skills

- HTML&Css3&Sass	- Vue & Vuex	- PHP
- <i>JavaScript</i>	- <i>Inoic</i>	- <i>Nodejs - MongoDB</i>
- <i>TypeScript</i>	- <i>Vuetify</i>	- <i>SQL - MySql</i>

Tools

- Linux	- Bootstrap	- JQuery
- <i>Bitbucket</i>	- <i>Github</i>	- <i>Ajax - Axios</i>

COURSES

-
- I learned C++ from university and also through Coursera courses .
 - I studied JavaScript from many places and courses.
 - I took courses from Ali Udemy advanced APIs in PHP.
 - I studied Vue js- The Complete Guide (Vuex & Router & Composition API (Udemy,Academind) .
 - I studied Ionic Vue - Create an Android iOS PWA with Ionic (Udemy ,Academind).
